DETAILED ACTION

1. This office action is in responsive to the paper filed on December 28th, 2006.

Claims 1 – 5 are presented for examination.

Claims 1 – 5 are rejected.

Claim 6 has been cancelled.

Double Patenting

2. **Claims 1 – 5 are provisionally rejected** on the ground of nonstatutory obviousness-type double patenting as being unpatentable over **claims 1 and 2 of U.S. Patent No. 6,897,626**.

Although the conflicting claims are not identical, they are not patentably distinct from each other because, for example, current application [10/772,297] claiming a position control device for controlling a controlled axis in accordance with a command movement to drive a servomotor controlling the controlled axis having means of calculating the position of the controlled axis, a virtual axis and controlling the virtual axis driving the controlled axis following the virtual axis. U.S. Patent No. 6,897,626 teaches a synchronous controller for driving a slave axis to synchronously follow a master axis performing a composite motion of a plurality of axes, comprising: a master-axis motion amount calculation section for calculating a motion command amount of the master axis by combining motion command amounts of the plurality of axes at every predetermined period; and a synchronous processing section for calculating a motion command amount of the slave axis at every predetermined period based on the motion command amount of the master axis calculated by said master-axis motion amount calculation section to be outputted for the slave axis.

This is a non-provisional obviousness-type double patenting rejection because the conflicting claims have been patented on May 24th, 2005.

Response to Amendment

Claim Rejections - 35 USC § 112

3. Applicants amend the claims 1 – 3 to overcome the 112(2) rejection; the examiner has withdrawn forth 112(2) rejections.

Claim Rejections - 35 USC § 102

4. Applicants amend the claims 1 – 3 to overcome the 103(a) rejections; the examiner has withdrawn the forth 103(a) rejections.

5. The claims 1 – 5 have been amended, yet, the amended claims conflicting with claims 1 and 2 of U.S. Patent No. 6,897,626 which claiming the same subject matters. Further Double Patenting rejection have been cited by the examiner based on U.S. Patent No. 6,897,626.

Art Unit: 2121

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
